Summary

I have 2+ years of Results-driven .NET Software Engineer specializing in architecting and deploying high availability enterprise applications. Proficient in modern frameworks (**.Net Framework, NET Core, C#, Angular, React**) and **RESTful API** development. Demonstrated success in engineering scalable systems, including reducing frontend page load times by 40% and increasing backend performance by 30% through advanced database tuning (**SQL Server, PostgreSQL**) and caching strategies. Adept at driving **Agile** development cycles, utilizing **Git/CI-CD** workflows, and writing clean, maintainable code to support complex, business-critical civic and corporate platforms.

Experience

- Guj Info Petro Ltd**
Software Engineer (.NET) [Official Title: Junior Software Engineer]
Gandhinagar, India
Feb 2024 – Present
- **Full-Stack Enterprise Development:** Engineered high-availability civic applications (Education Recruitment, HRMS, Health Data) supporting 10,000+ users, utilizing **.NET Core, C#, and Angular** to build scalable **RESTful APIs** and dynamic user interfaces.
 - **Architecture & Modernization:** Implemented the **Repository Design Pattern** to abstract data access layers across multi-district modules and other .Net Core Applications. Championed the migration of legacy **.NET Framework** monolithic systems to **Microservices**, reducing system latency by 30%.
 - **Database & Automated Reporting:** Managed robust **SQL Server (SSMS)** and **PostgreSQL** databases. Executed advanced query tuning and indexing to improve response times by 50%, and Delivered automated **SSRS/RDLC** reporting pipelines that reduced administrative manual effort by 60%.
 - **Agile & CI/CD Delivery:** Partnered with cross-functional **Agile** teams to drive requirements gathering, iterative delivery, and **Cloud** deployment strategies, significantly improving sprint velocity and release reliability.
- Specstem Digital Pvt. Ltd.**
Backend Developer
Surat, India
Nov 2023 – Jan 2024
- **API Aggregation System:** Developed a high-throughput, **TypeScript**-based job tracking engine that seamlessly integrated external APIs from 5+ platforms into a unified, searchable ecosystem.
 - **Algorithm Engineering:** Formulated advanced backend filtering algorithms capable of dynamically processing 1,000+ daily job posts, resulting in a 35% increase in user engagement.
 - **Database Optimization:** Optimized complex **MySQL** queries and backend endpoints within a fast-paced **Agile** environment, reducing average system response times by 40%.
- Independent Contract Developer**
Contract Software Engineer | Automation & Data Solutions
Remote
Jul 2023 – Oct 2023
- **AI & NLP Integrations:** Pioneered a custom browser extension leveraging the **ChatGPT API (OpenAI)** for real-time **NLP** communication, enhancing user productivity by **25%** and reducing response times by **40%**.
 - **Data Extraction & Automation:** Developed **Python**-based **web scraping** solutions utilizing **BeautifulSoup, Flask, and Pandas** to reliably extract and process real-time data from production websites.
 - **ETL & Cloud Synchronization:** Architected an end-to-end **data pipeline** to centralize, clean, and sync data between cloud storage (**OneDrive**) and legacy **VBA/Excel** systems, ensuring **99% accuracy** and reducing manual client effort by **70%**.
- Inkey IT Solutions Pvt Ltd**
Microsoft Dynamics 365 CRM & PowerApps
Surat, India
Feb 2023 - Jun 2023
- **Low-Code Application Delivery:** Built scalable enterprise business applications utilizing **Microsoft Power Apps (Canvas and Model-Driven)** to modernize user interfaces and automate cross-departmental workflows.
 - **Engineered 25+ Power Automate flows** that integrated disparate CRM, ERP, and marketing platforms; automated lead nurturing and reduced manual data entry errors by 15%.
 - **Enterprise Data Management:** Configured **Microsoft Dataverse** for secure data storage and integrated custom **Dynamics 365 CRM** entities to ensure highly structured and scalable data retrieval.

Education

Sarvajanik College of Engineering and Technology, Surat, Gujarat, India
July 2019 - Jun 2023

- B. E./B. Tech in Computer Engineering

Technical Skills

- **Backend & Architecture:** C#, .NET Core, .NET Framework, Node.js, Python (Flask, Django), RESTful APIs, Microservices
- **Frontend Development:** Angular, ReactJS, TypeScript, JavaScript, HTML5/CSS3
- **Databases & Data Management:** SQL Server (SSMS), PostgreSQL, MySQL, SQLite3
- **Cloud & DevOps:** Azure DevOps, AWS (EC2), Docker Containerization, CI/CD Pipelines, TFS, Git version control
- **Enterprise Tools & Testing:** Microsoft Dynamics 365 CRM, Microsoft Power Apps, Postman, Selenium, Agile Methodologies

Certifications

- Microsoft Certified: Azure Developer Associate (AZ-204)
- Python Programming
